

# Advanced Leadership Skills

## A practical training for executives

### *Idea and target of this training*

For managers, professional success depends on the ability to motivate staff and inspire them to achieve their goals. In short, the challenge is to take a group of individuals and, by supporting and pushing them, turn them into a successful team. A team that is able to react flexibly to changes in the business environment. This seminar will afford the participants the opportunity to reflect their behaviour as a manager and give them new ideas and tips on how they and their team can achieve their aims even more successfully in the future.

### *Content*

- › Authenticity and clarity in leadership
- › Systemic thinking and feeling
- › Dialogue-oriented leadership
- › Communicating objectives and expectations
- › Motivating employees
- › Showing appreciation
- › Giving feedback productively
- › Recognizing needs and different personalities
- › Managing relationships
- › Understanding and implementing success factors for teams
- › Leading with objectives and visions
- › Development phases of teams, and how to support them
- › Successful staff dialogues
- › Leading in an environment of change

### *Methodology*

The following methods are used in this training: Theory-input, individual and group exercises, plenum discussion, work on case studies

### *Target audience*

Managers interested in expanding their leadership skills

### *And what is special about this training?*

This is an intensive, highly practically-oriented training, using current issues from the participants' daily work as managers. All of the tips and ideas given are matched to the individual's working situation.
